

Maximized Micros for Maximized Yield

TILL-IT® FLUID IRON® is a liquid micronutrient product with iron EDDHA chelates for maximum stability and effectiveness.

TILL-IT® FLUID IRON® is effective and safe for in-furrow and soil applications of iron in any soil pH. TILL-IT FLUID IRON is ortho and polyphosphate compatible and combines the power of PURIC® humic acid with EDDHA chelated iron.

TILL-IT FLUID IRON takes the guess work out of high pH soils with EDDHA chelated iron and PURIC humic acid. High soil pH of 7.5 or greater limit micronutrient availability, especially iron which can cause stunting, yellowing, and stunting in your crops. FLUID IRON ensures availability in all soil pH levels and increases root growth and nutrient uptake with humic acid for incredible early season establishment and vigor.
